For Immediate Release Friday, May 9, 2003:

New York, NY, May 9 - eZmeeting, a leader in web collaboration and conferencing, announced today that it has completed a partnering agreement with Wacom Technology Corp., the world's leading maker of pen tablets. In a significant move in the fast growth web collaboration business, eZmeeting has emerged as an innovative technology firm that is introducing network application solutions that are unmatched in the industry. With this announcement, eZmeeting is moving into the next phase of their market launch. "We are very pleased to have the application and marketing power of a great partner like Wacom working with eZmeeting," said Charlie White, CEO of eZmeeting. "Our eZ software is saving firms time and money and growing top line revenue. There is no better time for eZ, the fastest way for your team to communicate."

"We believe in working closely with our software partners to develop complete solutions that strike a balance between power and ease of use", said Michael Marcum, Wacom Sr. Product Manager. "Using the annotation tools in eZmeeting with a Cintiq interactive pen display is as easy as writing on a whiteboard, but with all the advantages of digital ink."

eZmeeting specializes in developing graphic and real-time networking products. Its 2D and 3D graphics rendering engines are among the most advanced in the industry, while our networking technology provides a secure, managed channel for real-time data sharing, live collaboration, chat, and file transfer solutions over a peer-to-peer network.

The flagship product, eZ (www.eZmeeting.com) is a desktop software application that allows groups of people separated by distance to simultaneously connect with each other to review, share, markup and archive copies of all types of commonly used documents, including PDF, Word, PowerPoint, Excel, JPG, AutoCAD, screen captures and more.

eZ greatly improves personal productivity and increases corporate profitability with a better and faster method of visually communicating with a better and faster method of visually communicating that is cost effective.

Sigma Design, the parent company of eZmeeting, was established in 1975. It developed the world's first CAD system for architecture and facilities. In 1996, Sigma was acquired by private investors Mort Olshan and Charlie White. Today, Sigma Design has over 1000 companies using its products.

Wacom Technology Corp. is the world's leading maker of pen input devices and is known for the natural feel and superior performance of its patented cordless and battery-free pen technology. The company introduced the world's first cordless, battery-free, pressure-sensitive pen in America in 1989. More than two million presenters, collaborators and designers worldwide use Wacom pen technology. Wacom Technology Corp., a wholly owned subsidiary of Wacom Co., Ltd., in Japan, is headquartered in Vancouver, WA.
